

Emergency+ Smartphone App

Open the WBOC website on your smartphone, then open this document on the home page. Then click on the following link in the document:-

<http://emergencyapp.triplezero.gov.au/>

The following screen should display

If you have an Iphone, click on the App Store Free Download link.

If you have an Android phone (e.g. Samsung, HTC etc) click on the Google Play Free Download link.

If you have a Windows Phone click on the Windows Phone Store Free Download link.

When you open the app after it is installed, it should display a screen like the one below which shows your current address (might be one house out) and the latitude and longitude coordinates which are useful if you are in the middle of nowhere. You can then select which service you require.
